MYANMAR | Banging Pots & Pans Tradition 🇲🇲

According to the traditional beliefs of the Burmese people, banging the pots and pans is a belief. It is believed to cast out demons. On the evening of the first day of the new year, after the Myanmar New Year Thingyan, after reciting the safe sermons of the monks, their houses, Road Neighborhood Demons that can lurk in the city; were expelled with iron buckets.

But in 2021, banging pans and pots means revolutionary. The sound of the banging is unarmed and loves only the truth. We want to return to a democratically elected government. These are who want to oppose injustice and just the echoes of the Burmese people who want to take a soft against the military dictatorship.

This is a unforgettable memory showing how Myanmar people were united at fighting for Justice and Democracy.
